WARRANTY CONDITIONS

LEXAN™ THERMOCLEAR 2UV METALLIC GREY SHEET

10 YEAR LIMITED WARRANTY ON BREAKAGE & WEATHERING

LEXAN™ THERMOCLEAR 2UV Multiwall sheet grades L2CU2R13, L2CU2R15, L2CU2R17, L2CU2R27 in color Metallic Grey (GY6A744M) will not break due to loss of impact strength through weathering and loss of light transmission as defined herein, within ten (10) years of date of sale by POLYVANTIS India.

This limited written warranty is subject to the following conditions:

1.
This limited written warranty applies solely to standards produced by POLYVANTIS in India with a minimum gauge of 6mm in the standard color Metallic Grey (GY6A744M) used correctly as sloped, vertical or cold glazing, handled, stored, processed, installed and maintained according to POLYVANTYS India recommendations contained in the Technical Manual.

2.
This limited written warranty does not apply to sheet that has been scratched, abraded, or exposed to corrosive materials or chemicals.

3.
This limited written warranty is given only to the original purchaser of POLYVANTIS India sheet and does not extend to any subsequent purchaser or transferee. Any warranty claim hereunder must be made immediately within the warranty period by specifying the claim in writing and submitting to POLYVANTIS India the original sales receipt which must contain the name and address of the purchaser, the date of purchase, the complete product name, the lot number, and the volume purchased. On request of POLYVANTIS India claimant must allow the material to be inspected on site and/or return the sheet to POLYVANTIS India for testing.
For the purpose of this limited written warranty:

A. Loss of impact strength through weathering leading to hail breakage will be determined by subjecting an undamaged sample of the sheet to a standard hail simulation test developed by KRI-TNO, Delft, The Netherlands.
   Acceptance of a claim under this limited written warranty requires that this test (10 shots with artificial hailstones of 20 mm in diameter aimed at different points of the sheet surface with a speed of 21 m/s) causes at least 6 holes in the weathered surface of the sheet.
B. Color difference will be determined by subjecting a cleaned sheet sample to the Color Test CIELAB (1976). Any claims for sheets displaying a delta E of 10 or less, compared with their original value, will not be accepted.
C. Loss of light transmission will be determined by subjecting a cleaned sheet sample to the Light Transmission Test ASTM D1003:2011. Any claims for sheets displaying a loss of light transmission of 6% or less for Metallic Grey (GY6A744M), compared to the original value will not be accepted.

WARRANTY CONDITIONS

4.

POLYVANTIS India reserves the right to investigate independently the cause of any failure.

5.

If a claim under this limited written warranty is justified, POLYVANTIS India will provide replacement material free of charge in accordance with the following schedule:

Time from Orig. Purchase Date	Material Replacement
Up to 3 year	100%
In 4th year	70%
In 5th year	60%
In 6th year	50%
In 7th year	40%
In 8th year	30%
In 9th year	20%
In 10th year	10%

If replacement material cannot be provided within a reasonable period, POLYVANTIS India may opt to refund the original purchase price paid to POLYVANTIS India, or a portion thereof, in accordance with the above schedule.

6.

This limited written warranty shall be POLYVANTIS India sole liability and customer's exclusive remedy for the products and all other claims for damages are excluded. This warranty is in lieu of all other warranties (except of title), written or oral, statutory, express, or implied, including any warranty of merchantability or fitness of purpose.

7.

This 10 (ten) year limited written warranty shall be governed by the laws of India.

8.

This warranty has been issued in Feb 2020 and is restricted to material sold by POLYVANTIS India after such date and supersedes all previously issued warranties for the products mentioned above.

This warranty is valid for INDIA, SEA, NEW ZEALAND & AUSTRALIA (except in North, West & Central locations) with a maximum annual IR solar radiation of 1700 kWh/m²
